Principle #5: Base milestones on objective evaluation of working systems

- 5
- https://www.scaledagileframework.com/base-milestones-on-objective-evaluation-of-working-systems/

The point of SAFe is to Deliver Substantial Amounts of Solution Value

- Reliably
- Efficiently
- <<<< The ability to deliver value is influenced by an intense focus on
  - Working Systems
  - Business Outcomes
  - Ability of
    - ART (Agile Release Trains)
    - Solution Trains

4 SAFe Core Values

- Built-in Quality
  - 5 Aspects
    - Flow
    - Architecture & Design Quality
    - Code Quality
    - System Quality
    - Release Quality
- Transparency
  - Takes Time
  - Enabler of Trust
  - Trust Leads to Openness
  - Trust
    - Business
    - Development
- Alignment
  - Begins with Strategy & Investment Decisions
  - Clear Lines of Content Authority
    - Portfolio Epics
    - Features
    - Stories
  - Expectations & Commitments
    - PI Objectives
    - Iteration Goals
  - Cadence & Synchronization
    - enables planning
    - PI Boundaries Help mitigate variability
  - Architecture / UX
    - Sound Tech / Economic Solution
      - Guidance
      - Governance
  - Economic Prioritization
- Program Execution
  - Requires Leadership Support
    - Lean-Agile Leadership
    - Continuous Learning Culture

Enable Value Delivery Momemtum & Excellence Via

- Alignment
- Transparency
- Built-in Quality

10 Lean - Agile Principles

- https://www.scaledagileframework.com/safe-lean-agile-principles/

Confidence that either party can confidently rely on each other to act with integrity (esp in times of difficulty)

- An Absence of Trust
  - means you cannot build
    - high - performing teams
    - high - performing programs
    - confidence to make & meet reasonable commitments

- No Title

Keeps Stakeholders Engaged

- prioritization
  - agreed-to
  - continuous
  - rolling-wave priorities
- current context (market conditions)
- evolving facts
